

HAAS Combination Primary Crusher / Drum Screen

HDWV-D 700 x 2.000 with HTS 2.200 x 5.500

Drum Screen

- For the screening of all pre-crushed materials, soils, green waste, compost, waste, etc.
- Mesh sizes 0-10 mm, 0-20 mm, 0-30 mm, ..., 0-80 mm according to customer requirements
- Heavy infeed hopper, approx. 6,0 m³, with new form-closed hopper drive
- Silenced drive motor
- Drive system with hydraulic chain tensioner
- Can be used with drums of varying sizes
- Conveyor belts with galvanized trough design

80
screening drum

Double Shaft Primary Crusher

- Ideal crusher for the disintegration and the volume reduction of for example: wood waste, pallets, all kinds of waste, mattresses, green waste, root stocks, etc.

crushing shafts

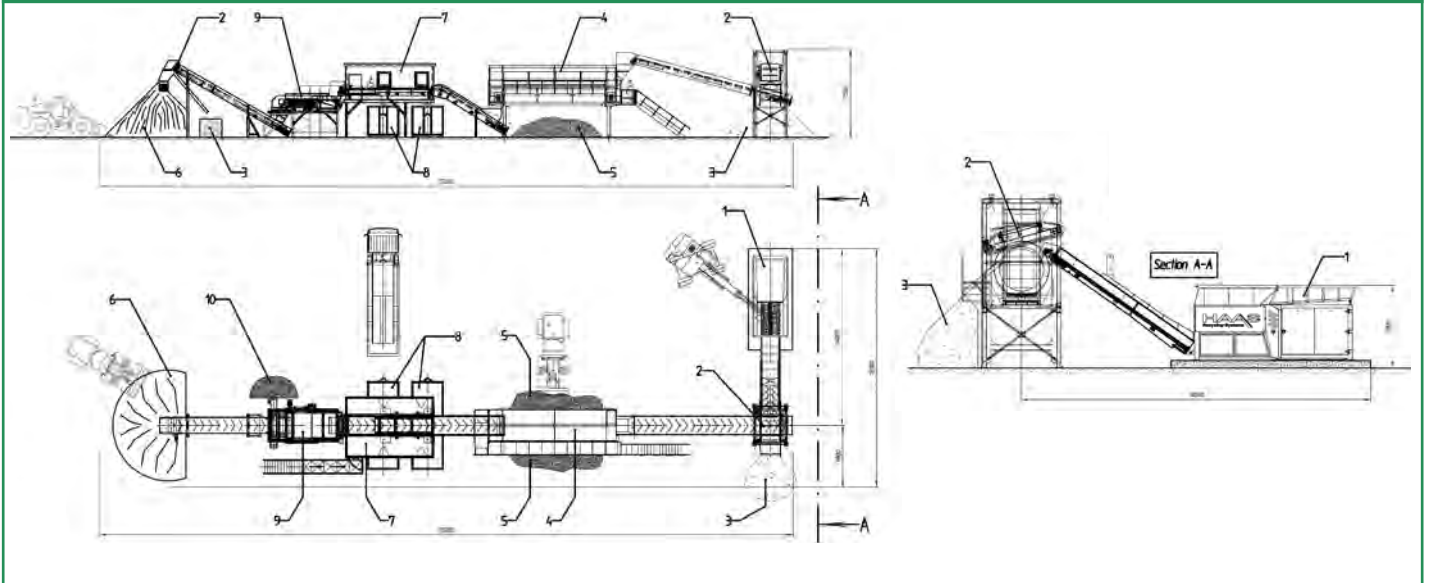

- Final product 0-350 mm, 0-200 mm or 0-150 mm possible
- Rpm of the shafts is adjustable from 0 to 40
- The two shafts are equipped with separate drives and can therefore be driven with different rpm
- Special HAAS shredding programs for different materials

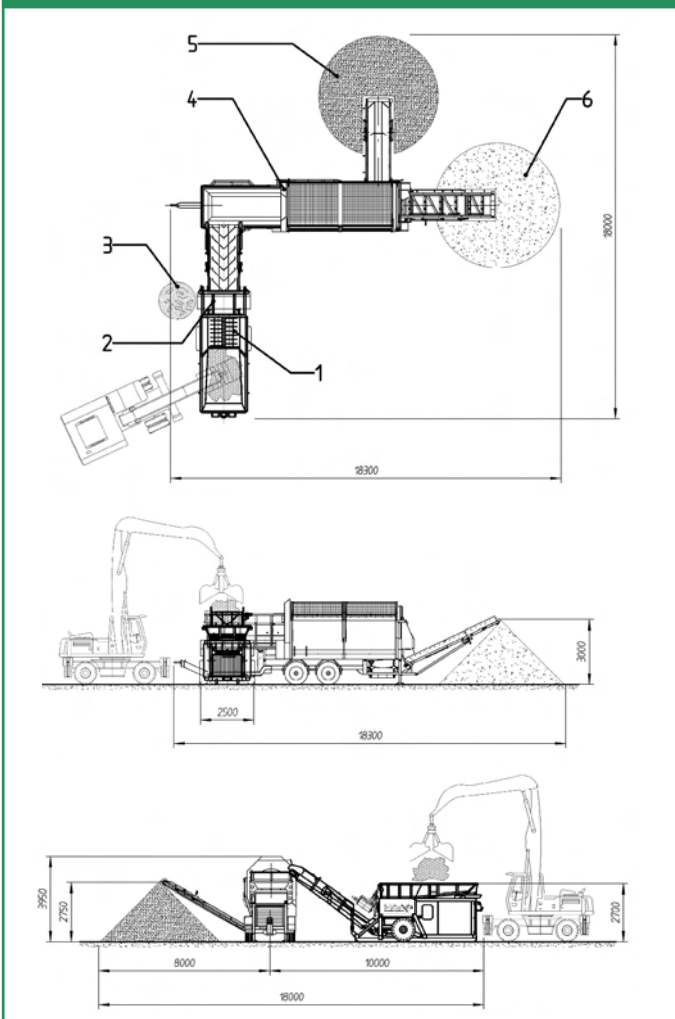

HAAS
Recycling-Systems

For the processing of household-, industrial- and construction waste and many other materials

Stationary

Mobile

Legend:

1. pre-crushing (mobile/stationary)
approx. < 300 mm (possible from
< 150 to 700 mm) – HAAS HDWV
2. overband magnet
3. separated metal
4. drum screen (mobile/stationary)
5. organic part/fines (< 20 mm; different
fractions to be chosen)
6. cleaned coarse grain
7. sorting cabin with 4 places for manual
sorting
8. container for separated material
9. eddy current separator
10. separated non ferrous parts (aluminium,
copper, tinplate, etc.)
